KVM Switch 1-4 -USB Version

Details correct on: 09/12/2014

Notification	
Product Code	KVM-610
Short Description	KVM switch 1-4 -USB version
Full Description	Fully compatible with USB specification, the KVM-610 Switch box is a combination of Keyboard/Video/Mouse switch and a USB peripheral sharing device. It is possible to control up to 4 PCs, G3/G4 Macs or iMac from 1 USB keyboard, 1 USB mouse and 1 monitor. Its peripheral sharing function enables sharing of other USB peripherals among connected computers. Switching between computers is easy as pressing the push button. There is no interface card and software to install and is independent of the computer operating system. The KVM-610 is also rack mountable with an optional rack mount kit. Rextron
